

Pregnenolone

100 mg, 60 capsules

Product code: CP5713

Produced by the body's adrenal glands, pregnenolone is a direct precursor of both DHEA and progesterone. Pregnenolone is the building block for all other steroid hormones. Pregnenolone levels dramatically drop after age 30. Research indicates that restoration of pregnenolone to levels of healthy young adults may have a positive effect on memory, mood and energy.* We recommend that pregnenolone be taken once daily in the morning or night to mimic the body's normal rhythm.

Recommended Dosage: Take 1-2 capsules per day at bedtime or early morning

Product Cautions: (none)

Shipping Restrictions: Australia, Brazil - 3 month supply.

No import to: Canada, Switzerland, United Kingdom (Great Britain)
